

FSMonitor™

Q.

If you had 300  workstations,
 collecting data for 150  departments,
 in 14  plants,
 spread across 8  states,
 throughout any  country,
 on the  planet,
 how would you know if anything went wrong?

A.

FSMonitor.

FSMonitor™ by Factory Systems gives users, from supervisors to CEO's, the opportunity to view their processes, current production rates and machine efficiencies. Think of it...you're viewing the globe on a large screen display and a red dot appears. You drill down to the country, then to the state, then plant, department, workstation, feature...until you have the exact cause of the alarm - a worn tool.

How much **SCRAP** did you just **ELIMINATE??**

FSMonitor

Key features and benefits of FSMonitor:

- Overall Equipment Efficiency (OEE)
Machine availability, performance, quality for real time evaluation of your machine efficiencies
- Machine Up/Down, Run/Idle times
Graphically and numerically
- Real-time Events/Alarms notification
Learn immediately when a serious problem occurs via:
 - E-mail alarm notifications
 - Digital Paging
 - Windows Messaging
- Drill down to specifics:
Country, State, Plant, Department, Cell, Workstation, Machine, Process, Feature
- Automatically Drill down for selected Events
Change displays to zoom in on priority events/alarms
- Production parts counts to schedule
Know where you stand before you get behind
Be aware that you will need to run overtime well in advance
- Graphs by Hour, Shift, Day, Week, Month
- All Displays are User Configurable
Use any standard .jpg, .gif, .tif, .bmp files
Take pictures of your actual cells and machines
- Multiple Plants, Departments, Cells
Alternate displays between plants in different states
Scan each department once per hour
Temporarily zoom in on a problem department every 30 minutes
- Banner Messages
Congratulate the team with the best safety record
Welcome the newest associate to the company
Announce a birthday, anniversary or meeting
